

A-Frame Setup Instructions

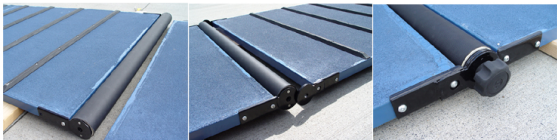

You will receive three boxes with your 9' A-Frame (or two boxes with your 7' A-Frame). Inspect all contents upon receipt to ensure that there is no shipping damage.

To unfold ramps, squeeze the handles on the hinges at the same time and unfold until flat. The hinge will lock into place once the ramp is completely flat.

Connect the cylinder caps to the top of each ramp, then connect the cylinder to the first ramp.

Connect the ramps to each other by lining up the cylinder caps on the cylinder and tightening the hinge knobs.

Turn the A-Frame onto its side and attach the black bars onto the back to reinforce the hinges. Connect the chain from one ramp to the other.

Carefully stand the A-Frame upright and it is ready to use!
